

## COMPANY PROFILE

---

SES Energiesysteme GmbH, founded in 1998 and headquartered in Berlin, is a manufacturer and service provider of cogeneration systems with capacities of between 50 and 4,500 kW. Sales department, Research & Development, project management, Finance & Administration and purchase department are all located in Berlin. Furthermore, the company maintains a branch office and production site in Leipzig, Saxony. Own service centres are located in Berlin, Leipzig, Munich, Düsseldorf and Hamburg.

The combined heat and power plants are available either as compact modules, disassembled in containers or fully installed in buildings and can be designed for biogas, natural gas or sewer gas.

SES distributes its products across Europe, with a holistic service portfolio spanning project planning, construction and start of operation through to servicing and maintenance.
